About the workshop

From 7:30 PM everyday

Join our comprehensive QGIS workshop, led by eminent professional and key expert! Over the course of the workshop, you'll gain hands-on experience with a wide range of topics, including geo-referencing, reprojection, vector file generation, database management, and spatial analysis. Master advanced techniques such as thematic mapping, overlay analysis, and spatial autocorrelation, and take home the skills to generate stunning layouts and perform complex spatial analysis using QGIS.

NO RECORDING WILL BE PROVIDED | Participation certificates will be provided to all participants
